

How to Sync your App to the Event

If you have an account with OneASICS™, please make sure to log out of that account from the webpage before syncing to our event, and enter the ID (email) of the ASICS Runkeeper™ account that you wish to use for our event. ✂If you sync to our event without logging out of your OneASICS™, the system may automatically sync to your OneASICS™ account, even if you did not choose to do so. Please make sure to sync with your ASICS Runkeeper™ account, and check if the registered ID (email) is correct.

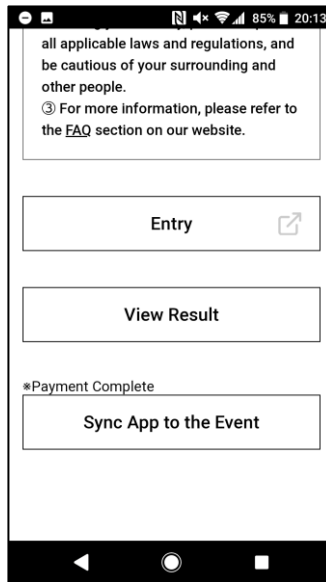

1

First, download the specified running app.

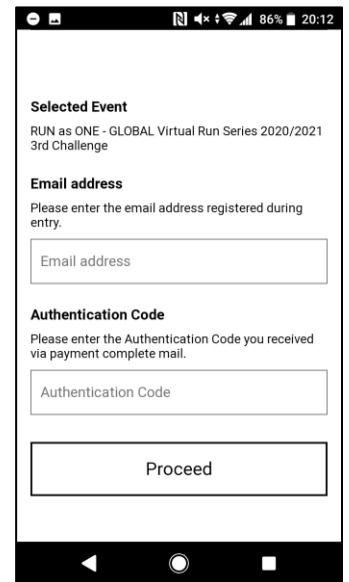

2

Go to the respective event page on the TMF VIRTUAL RUN site, and click "Sync App to the Event".

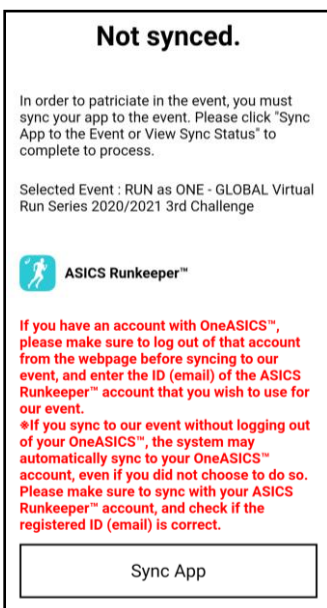

3

Once you see the, "App Sync Status" page, enter your registered email address and authentication code.

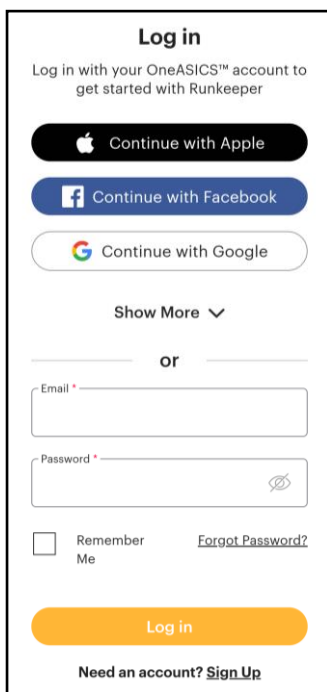

4

By clicking "Proceed" you can view if you have properly synced your app. If the status indicates that it is not synced, please click "Sync App".

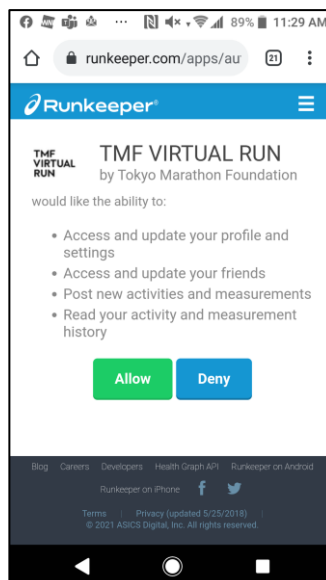

5

You will find available login options. Please select the account you belong and continue to link your account to the event.

6

Review the conditions and if you agree, click "Allow".

7

With this, the sync is complete. Check the registered ID of your synced app.
